

# Specification sheet

## New Pig Bladder Attachment

Product Code: 01-1075

### Benefits

UV and chemical resistant, the New Pig Bladder Attachment replaces existing bladders, once they're contaminated. Ready to connect to a New Pig Spill Deck it delivers an additional 208L of spill containment.

Only deploying once the Spill Deck's sump is full, it is space efficient, and a reliable back-up that means there are no compliance headaches.

We'd say it's wise to have a spare one on hand.

### Features

- UV and chemical resistant
- Automatically deploys once a New Pig Spill Deck sump is full

### Specifications

- Gives an additional 208L of spill containment
- Pre-drilled ports for easy installation
- Weight: 1.8kgs
- Dimensions: 1,676 x 1,473mm (h,w,d)
