

Description: Sorbent Booms - Oil Only

Product Code: 10-1000 / 10-1001

Sorbent Boom - Oil Only

Product Features

If oil, diesel or another hydrocarbon spill and gets into a waterway, it needs to be contained. Whether it's into a river, a lake, a harbour or an estuary, it needs to be retrieved.

Controlco Sorbent Booms are your first line of defence. Polypropylene is packed into a tough outer mesh. This allows even the most viscous oil to be drawn right inside the boom - rather than just coating the outside. The internal rope and clip system allow multiple lengths to be joined together to form a strong, effective barrier.

Because they love oil and resist water, the booms will remain afloat for long periods of time, even when fully saturated.

- Stark white colour to clearly highlight oil saturation
- Tough outer UV-resistant mesh
- Bright orange mesh for excellent visibility
- White, multi-perforated polypropylene core
- Remains floating, even when fully saturated
- Nickel / chrome plated clips and rings for linking to other booms

Product Code	Absorbs (per boom)	Dimensions	Colour	Suitable for	Weight
10-1000	30L	130mm x 3m	White	Oils and fuels	4.0kgs (dry weight)
10-1001	80L	200mm x 3m			6.25kgs (dry weight)
