

Specification Sheet

Flexi Bund - Corner Section

Product Code: 02-1008

Product Features

These brilliant corner sections create structure for Controlco Flexi Bund customisable lengths so they fit the shape of the buildings they protect even better.

Usually deployed in large warehouses, the high-visibility, durable bund solutions will bounce back when run over. This gives forklifts and other vehicles unrestricted access while keeping spills or leaks safely contained.

We recommend securing to floors using adhesives or alloy strips and anchors – depending on how heavy the traffic is.

Features

- Provides flexible bund sections with structure
- Supports access to busy areas while providing perimeter spill containment
- Cushions passage for drivers and vehicles
- Provides a visual barrier, heightening awareness of spill danger
- Durable and workplace-friendly

Specifications

- High vis yellow
- Chemical and UV resistant
- Dimensions: 400mm (each side)
