

Specification Sheet

Flammable Plunger Can - 1L

Product Code: 04-2002

Product Features

Dispensing flammable liquids and solvents onto cleaning cloths should be safe, easy and minimise waste. This Flammable Plunger Can is so straightforward an apprentice could use it. (Because they probably will be.)

Pushing down on the pump fills the upper pan, the top rims moulded edge makes moistening simple, and surplus liquid drains safely back into reservoir.

For user and workplace safety the perforated upper pan serves as a flame arrester, while the pump's base is specially designed so it needs to be refilled less often, saving time and hassles.

Features

- Easy to operate - moisten cloths quickly and without fuss
- Reduces waste
- 100% leakproof for staff and workplace safety

Specifications

- Constructed in high-grade coated steel
- Chemical-resistant Ryton® and brass base
- FM approved
- 1L capacity
- Weight: 0.8kg (empty)
- External dimensions: 143mm H x 185mm (outer diameter)
