

# Specification Sheet

## Oily Waste Can - 23L

Product Code: 04-2004

### Product Features

Rags and cloths soaked with solvents, thinners, linseed oil, combustible adhesives and other flammable liquids are a disaster waiting to happen if they're not managed properly. And they're most definitely not something you want lying around.

This sturdy, Oily Waste Can reduces the risk of fire caused by stray sparks or spontaneous combustion by securely isolating contents from potential fire sources and effectively limiting the oxygen supply.

### Features

- Sturdy construction – to take the knocks
- Round design and an elevated base allow circulation of air, dispersing heat and reducing moisture build-up and rusting
- Easy, foot operation keeps hands free, while high visibility encourages compliance
- Self-closing lid reduces risk of combustion

### Specifications

- Durable steel construction
- 23L capacity
- Weight: 4.5kgs (empty)
- External dimensions: 403mm H x 302mm (outer diameter)
