## Oily Waste Can - 38L

Product Code: 04-2005

### Product Features

Looking like it would be at home in a fire station, this is a kitchen tidy on steroids. Highly visible, the Oily Waste Can encourages compliance by acting as a constant reminder of the fire risk rags and cloths soaked with solvents, thinners, linseed oil, combustible adhesives and other flammable liquids pose. (Never mind the mess and clutter in the workshop.)

Oily Waste Cans prompt users to dispose of oil-soaked rags safely, reducing the risk of fire caused by stray sparks or spontaneous combustion. The lid opens to no more than 60 degrees and is closed when not in use. This isolates contents from fire sources, virtually eliminating the risk of spontaneous combustion.

### Features

- Sturdy construction means they are ideal for busy workshops
- Round design and an elevated base allow circulation of air, dispersing heat and reducing moisture build-up and rusting
- Foot operated for convenience
- Self-closing lid reduces risk of combustion

### Specifications

- Durable steel construction
- 38 litre capacity
- Weight: 5.5kg
- External dimensions: 464mm H x 354mm (outer diameter)
