

Specification sheet

Enviropeat - 9kg Bag

Product Code: 11-1003

Benefits

Enviropeat is a 100% natural product which has an unbelievable ability to absorb, retain and break down oil spills.

A waxy surface makes it float, so it's an excellent solution for collecting oil off water, especially in and around shorelines. We recommend partnering it with marine protection products including the Hazero Sorbent Boom.

In addition, Enviropeat is brilliant for dealing with oil spills on grass, gravel or other uneven surfaces. Just sprinkle on, wait for a bit, and sweep or rake up, then dispose of in a handy Hazardous Waste Bag.

Each Enviropeat bag absorbs 20L per bag, which is pretty good going.

Features

- Easy to dispense. Easy to retrieve
- Highly effective on land or water
- Naturally-sourced pollution fighter

Specifications

- 9kg bag
- 100% natural
- Absorbs up to 20L per bag
- Loose fill
