

Specification Sheet

Laboratory Spill Kit

Product Code: 13-2002

Product Features

Protocols for dealing with chemical spills, however minor, should leave nothing to chance. This kit is a lab essential – whether it's in the healthcare industry, medical practices, schools, the food industry, or vets.

One convenient pail becomes the go-to for safely and quickly responding in an emergency, right down to providing caution tape and PPE.

Also recommended for containing broken glass.

Features

- Lab-specific spill clean-up solution
- Includes PPE for responder protection
- Quick and easy to deploy
