

Specification Sheet

Drum Plug - 250g

Product Code: 22-1005

Product Features

An excellent addition to spill kits, this compound provides a fast, effective temporary way to plug leaks of hydrocarbons and other hazardous liquids, preventing events escalating. Quickly sticking to even dirty, greasy and rusty surfaces it remains flexible for up to 24 hours after application. Suitable for a wide range of solvents, alcohols, and bases.

Also available in a 1kg tub.

NOTE: Not suitable for Phosphoric acid, Hydrofluoric acid, Triethylamine 99%, Sulphuric acid 96% and Hydrogen peroxide 15%.

Suitable for sealing leaks of the following liquids:

Acids:

- Lactic acid
- Hydrochloric acid 37.91%
- Acetic acid 99.50%
- Nitric acid 69.50%

Alcohols:

- Ethano
- Propanol
- Methanol 99%
- Mineral Alcohols

Bases:

- Sodium hydroxide 40%
- Liquid caustic soda

Solvents:

- Trichlorethylen
- Perchlorethylen
- Toluene
- Gasoline
- Hexane

Other liquids:

- Ethylenglykolmonobutylether
- Diethylenglykolmonobutylether
- Ethylendichloride 99%
- Amylacetate 99%
- Methylenchloride 99%
- Water based paints
- EDC (acidic)
- EDC (alkaline)
- Methylisobutylketone 99%

Not suitable for containing the following liquids:

- Phosphoric acid
- Hydrofluoric acid
- Triethylamine 99%
- Sulphuric acid 96%
- Hydrogen peroxide
