

Hazero Flexi Bund

Product Code: 02-1006

Benefits

This is one of those bright ideas you wish you'd doodled on a napkin.

Forklift and truck safe, these durable bunds have at their core a memory foam. That lets them bounce back when a vehicle drives over them while continuing to provide reliable tertiary perimeter spill security.

Fantastic for doorways, they're typically used in large warehouses and have been described as a "safety hug" for walls. (We'll take that.)

Available in metre lengths cut to suit, and with corner pieces to join them, Flexi Bund can be secured by adhesives or alloy strips and anchors. Just tell us what's needed.

Features

- Allows access to busy areas while providing perimeter spill containment
- Cushions passage for drivers and vehicles
- Provides a visual barrier, heightening awareness of spill danger
- Durable and workplace-friendly
