

Choosing A Drain Protector

Drains close to where hazardous substances are used or stored need to be protected. Innovative drain protection products keep businesses ahead of the very real risk chemicals pose to waterways the environment and aquatic life. Apart from anything else, your next fish and chips are depending on it.

Wherever possible, we'd recommend a pre-emptive approach with reliable drain shield products that mean, if a spill happens, it's already covered. Literally. Plus, there's range of products that help cut spills off at the pass, in case of an emergency. Create a safer working environment with Hazero Drain Protection.

Filtration:

Device that captures contaminants while allowing clean water to pass through.
