

Specification sheet

New Pig Overpack - 100L

Product Code: 03-1001

Benefits

No one wants hazardous waste leaking from containers that have been compromised, or from machinery parts that are damaged. It's definitely unsafe and leads to issues including Health and Safety concerns and potential contamination.

This overpack is a secure solution for transporting or isolating those items until they can be safely and compliantly disposed of.

Made of 100% UV protected polyethylene it can deal with a variety of substances including acids and corrosives. So, that's one thing less to worry about.

Meets US DOT and UN performance requirements.

Features

- Made in 100% UV protected polyethylene
- Designed for easy transfer of dangerous goods when containers are compromised
- Helps ensure compliance and site safety
- Twist down, half-turn lids

Specifications

- Storage capacity: 246L
- Weight: 22kgs
- Top diameter: 705mm
- Height: 953mm
