WHICH RANGE IS RIGHT FOR YOU?

Select your risk profile

CORE

Entry-level protection. Focused on storage functionality.

PREMIUM

Increased charging capabilities and alerts.

ADVANCED

Highest level of protection for operational consequences.

INCREASING LEVEL OF RISK MANAGEMENT

CORE RANGE

Essential Protection & Storage

A practical first step for businesses concerned about the growing risk of Lithium-ion battery fires.

Designed to store and charge batteries away from occupied work areas, helping reduce exposure to personnel, property, and operations.

PREMIUM RANGE

Maximum Charging Capabilities & Alerts

Designed for organisations charging Lithium-ion batteries daily where early warning is critical.

Enhanced detection and alarm systems provide immediate audible and visual alerts, helping personnel respond quickly before a minor issue develops into a major incident.

ADVANCED RANGE

Maximum Charging Capabilities & Risk Management

Our highest level of protection for organisations where a battery incident could result in serious injury, operational shutdowns, asset loss, regulatory scrutiny, or significant financial consequences.

Combining advanced detection, automatic fire suppression, and real-time SMS alerts, the Advanced Range is designed to help minimise the impact of an incident and protect what matters most.
