

Specification sheet

Safety Gloves – Nitrile Protective

Product Code: 14-1007

Benefits

Their hands are usually the closest responders physically get to a hazardous spill. Which is what makes these gloves so important.

Providing good chemical protection they also allow the wearer to actually feel what they are doing – essential when dropping clean-up products is not an option.

The textured palm gives a bit of extra grip and the gloves' durability and puncture resistance provides the confidence people need to get the job done.

Features

- High levels of resistance to hazardous and corrosive chemicals
- Puncture resistant
- Avoids potential latex allergies

Specifications

- 100% nitrile
- 350mm long with textured palm
- Gauntlet cuff – for extra protection
