

Storm Sentinel - Round

Product Code: 22-1010

Benefits

Looking after drains is one of the most important, pre-emptive actions businesses storing hydrocarbons can take. These simple but effective guards prevent sediment entering the storm water system and they're good for around 3-6 months. (If there are heavy sediment loads, it might be less than that. It's best to check regularly.)

Easy to install and remove, the self-supporting unit sits out of sight below the drain grate. The oil absorbent media inside ensures that small hydrocarbons spills are captured before they reach the storm water system.

Features

- Efficient, reliable secondary or tertiary storm water contamination protection
- Durable, quality design and construction
- Easy to install and easy to remove

Specifications

- Fits round drains from 685mm up to 740mm
- Holds up to 20kg of dry sediment
- Holds up to 55kg of wet sediment
- Hangs 560mm into the drain
